

# Peace for All

December 2015

By Prashant Gupta

Its reflection time and it has been almost two years since the last prayer. For past several months, the concept of universal brotherhood has been on the mind. Five thousand human years on earth is a very small measurement of time when you see galaxy movement and as our species built new systems around concepts of commerce, country and communication – complexity and boundaries emerged. Over this period, many unique thought streams of peace emerged from deep silence and spread across human habitations and contributed to inner well-being and peace. This prayer is a gratitude and celebration of nine such thoughts.
