

# Justice

January 2009

A man makes false promises, exploits others for selfish gains and breaks the trust quite often! Is it a sin? In scriptures, it is termed as “a wrong action”.

Justice means everyone gets what one truly deserves – reap what you sow! The deeper understanding and respect for Justice ensures order and guides everyone to do the right action. But still, there are men on earth who abuse fellow humans and disturb harmony.

Courts are one of the popular instruments of Justice. Unfortunately, the present court system has become not only expensive but also time consuming. And surely, delayed justice is justice denied. Then how to deal with such men? These wrongdoers exploit inefficiencies of courts and continue on their paths of selfish gains without any respect for other living beings. When some oppressed ones do raise voice to have others hear – in most cases, the wrong doer threatens and resorts to violence to suppress voice – and some times, even takes away life.

In present situation, all this is giving way to growing social inequities and greedy exploitation around the world and creating an imbalance world! The right instrument of Justice is a necessity for the sake of larger peace. In scriptures, God has told us that Justice shall prevail at the end. But, what is the price of patience for a life on earth? Let's pray for him to show us a new direction otherwise, harmony will only be lost in translation!
